Continuation of 5. does NOT place the application in condition for allowance because: The claim language as written in claim 1 is still confusing and could be interpreted in several different ways, such as (1) all three elements, i.e., the common electrodes, pixel electrode and the TFT's are all on each of the inner surface of the front and rear plates (2) the TFT's are on each of the inner surface of the front are rear plates, as pointed out in the earlier office action (3) any two of the elements could be on the inner surface of the front and rear plate Claim language should make it clear that the common electrode is on the inner surface of the front plate, pixel electrodes and the TFT's the rear plate as indicated on page 2 of the request for reconsideration, which then will be consistent with the drawings.
